

Computer and Network IT Managed Services

Let HV Tech Solutions help manage your computer network to proactively reduce service calls!

HV Tech's IT Managed Services acts as your own IT department to provide routine computer system maintenance for your existing equipment and includes remote technical support using our remote management tools. With Managed Services from HV Tech, you have accountability for all hardware, software and computer-related services. HV Tech Solutions manages many computer networks in Westchester NY, Rockland NY and Orange county NY.

WHY DO YOU NEED MANAGED SERVICES?

At HV Tech we can monitor the availability and performance and health of virtually any network IP-enabled device, including desktops, laptops, servers, printers, copiers and routers and VOIP phones. Our computer monitoring software uses software agents and probes to gather all critical data and build an inventory of devices of your network so it can be managed proactively. This allows us to troubleshoot and fix 70% of all computer related problems without having to come on site. This saves you time and money and keeps your employees productive by minimizing downtime. Our quick response coupled with a comprehensive maintenance plan will dramatically improve the reliability of your computer systems and reduce your overall investment in computer-related services.

Call Now to see how IT Managed Computer services from HV Tech Solutions can help you!!
